

Cool Springs EyeCare Features the Most Advanced Sports Vision Training Program in the Southeast.

All sports vision training at the Competitive Edge starts with an individual assessment. Our trainers evaluate you based on the your individual sport, your position and level of play. We look for tendencies-- such as favoring a certain side and how balance and coordination affect your field of vision. An assessment, including the evaluation and recommendation, takes about 1- 1 1/2 hours and are scheduled on Tuesdays, Thursdays and Saturdays. Cost is \$250. Ask about current specials.

We start with an assessment of the areas of vision that are consistently tested during competition such as eye-hand and foot speed, vision memory, reaction time, depth perception and peripheral awareness. The assessment establishes a baseline and ranks you against other players your age.
